The History of Breeding mice for Science Begins With a Woman in a Barn

Talk by Dr Jyoti Kode

Abbie E. C. Lathrop,

A school teacher, pernicious anemia, poultry farming, mice breeding

In her small white farmhouse in Granby, Massachusetts, bred a variety of small animals: ferrets, rabbits, guinea pigs, rats, and, most notably, mice.

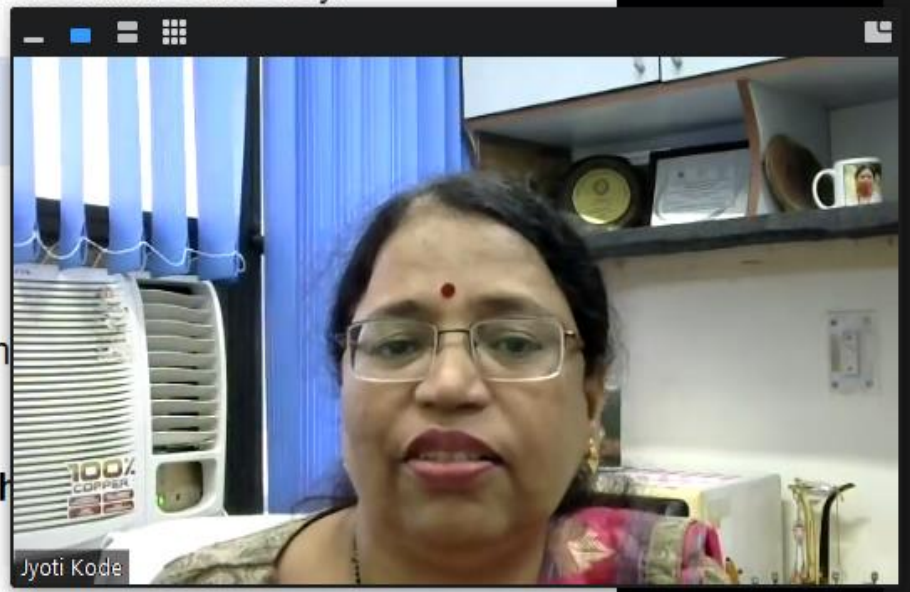

In 1902, her mice became the first to be used in a lab for genetic research—which continues till today.

Miss Abbie E.C. Lathrop at Granby. Redrawn from the Springfield Sunday Republican, October 5, 1913. (Elsevier)

Not a trained scientist, Lathrop attracted to mice. Business woman turned self-made scientist,

Careful and methodical mouse breeding helped advance m **create a standard organism of science.**

She published scientific papers on mice and cancer in future cancer research.
